

VIST 405

Project 1 Presentation (September 22):

Duration : 20 mins including Demo

Your presentation should summarize your project and its process, highlighting key development decisions and illustrating process through documentation and project goals

- Slides: 5-6 pages
- Introduction –Title, Team info, Goal
- Concept + Technical Research
 - Illustrate any conceptual development research
 - Illustrate technical development research
- Project Development and Design
 - Use illustrations and sketches to show how you have developed detail of your project concept
 - Discuss how your concept has developed and/or matured through the development and prototyping cycle
- Process
 - Illustrate the development of your project by using weekly documentation. Do this in a summary form that illustrates conceptual and technical development.
- Creation of Project 1
 - Illustrate and explain how you created your project, and any design iteration
 - Illustrate and explain how the system operates functionally and technically
- User Experience
 - first-person experience, second-person experience(interview), third-person experience(observation)
- Future Plan
- Demo: Illustrate how your project operates in terms of:
 - Concept
 - Functionality
 - Interaction, Experience
